

# Shoulder Surgery for Sports Injuries

## Instructional course and hands-on workshop

3 & 4 September 2008

Beaumont Hospital, Dublin, Ireland

The course aims to provide participants with practical hands-on experience in surgical techniques for sports injuries to the shoulder. Arthroscopic techniques will include shoulder stabilisation, treatment of impingement and rotator cuff repair. Open techniques will include capsular shift, rotator cuff repair and posterior stabilisation. It is desirable for participants to have previous experience in diagnostic shoulder arthroscopy. Each fresh-frozen cadaver workstation will be fully equipped to allow these procedures to be performed by the participants.

Hands-on tuition using fresh-frozen cadaveric workstations for

- Arthroscopic Shoulder Stabilisation Techniques
- Arthroscopic Acromioplasty
- Arthroscopic Acromioclavicular Joint Resection
- Capsular Shift
- Posterior Stabilisation
- Repair of SLAP Lesions
- Frozen Shoulder
