HOLDING FAST

- Single-step insertion
- Two sutures distribute load
- Independent suture channels reduce suture binding
- Achieves excellent soft-bone purchase

Mitek[®] *The First Name in Suture Anchors[®]*
PRODUCTS

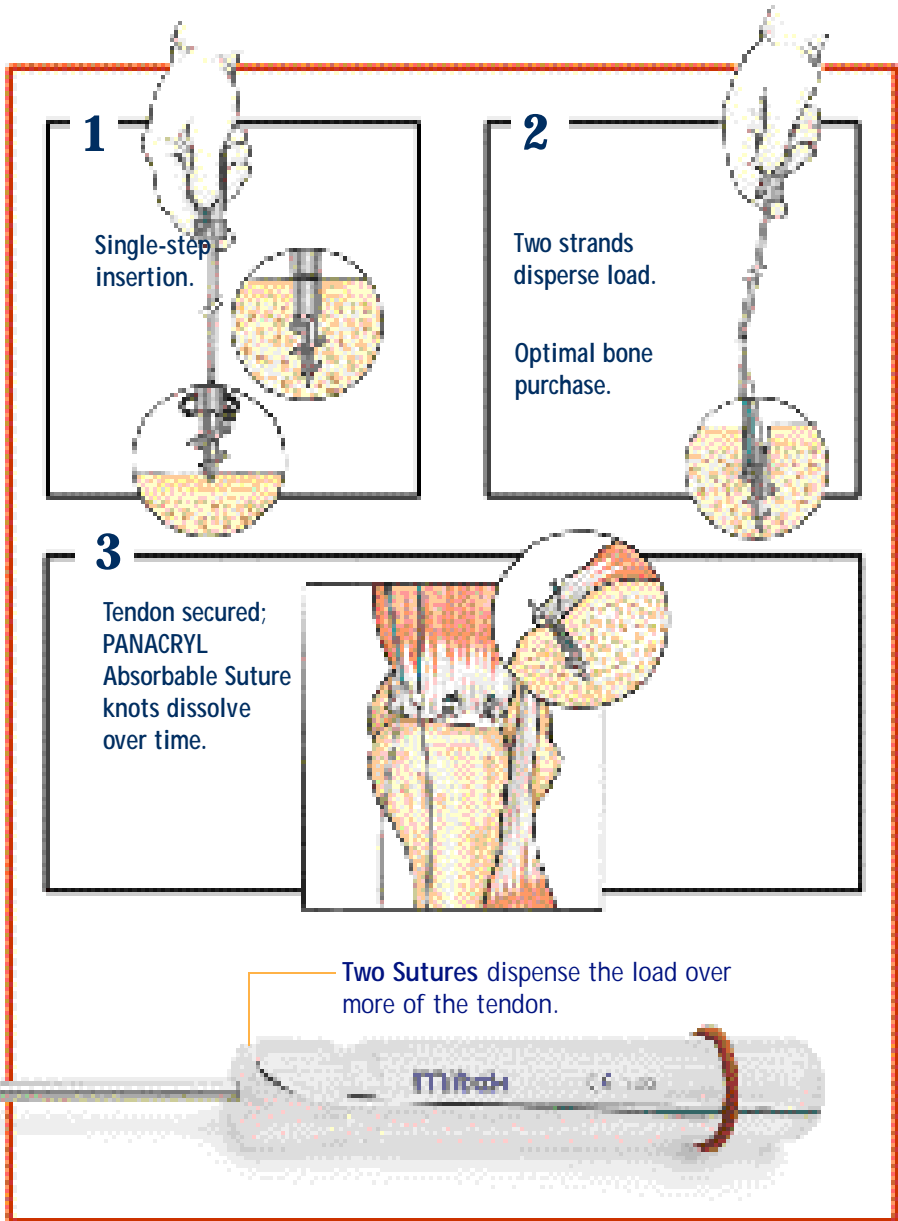

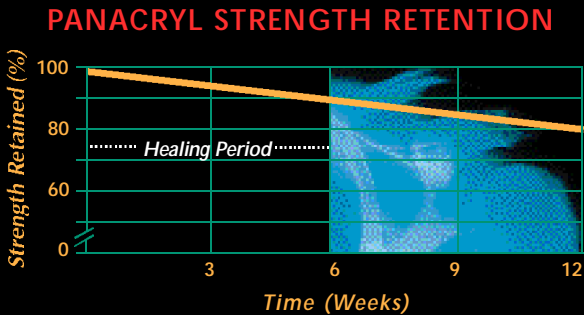

HOLDING POWER

FASTIN RC is available with PANACRYL™, the braided long-term absorbable suture that retains 80% of its original strength through 3 months. It holds while your patient heals, then it absorbs completely, leaving no knot to impinge, irritate, or inflame soft tissue. PANACRYL Suture's braided construction offers ease of knot tying and handling, and its unique coating allows smooth passage through anchor and tissue.

FASTIN® RC

DUAL-CHANNELED ANCHOR

Unique T-Hex Design provides independent suture channels to help prevent suture binding.

Anchor's wide threads and small core optimize bone purchase.

Needlepoint tip permits atraumatic hand insertion through soft tissue.
